

Energy without CO₂

Years 7-10

A search for more efficient and clean ways to transform energy is one of the biggest research challenges for Australian science. This hour-long session will demonstrate the way that the energy for transport, heating, lighting and cooking could be harnessed without generating CO₂, and some of the consequences of greenhouse gases accumulating in the atmosphere. Energy Transformed is designed around Levels 5 and 6 of the Victorian Essential Learning Standards.

DETAILS:

Years 7-10, 60 minute duration

Location	Cost per session	Maximum students per session	Minimum cost per day
School of Chemistry Melbourne University	\$150	60	n/a
At your school (Metropolitan)	\$245	60	\$490
At your school (Regional)	\$320	60	\$640

Cost Structure:

A 2-tier cost structure operates for VICS travelling programs. There is a cost per session and a minimum cost per day - whichever is the greater will apply.

VICS and CSIRO Education attempt to fit as much of a program into as few days as possible.

If a program runs for more than one day or with more than one presenter (because it will not fit into one day), a reduced minimum cost per day will apply for the second and subsequent days or presenters. The minimum cost per day for subsequent days is \$380 metro/\$530 regional.

If a school opts to spread their program over more days and/or with more presenters than necessary, the full minimum cost per day will apply for each day and presenter.

VICS is a multi-campus institute comprised of Chemistry Schools at Melbourne and Monash Universities, and the discipline of Applied Chemistry at RMIT University. The Victorian Government, CSIRO and ARC Free Radical Centre of Excellence proudly sponsor the Outreach Program.

Regional Schools: Please call to discuss tour details and availability of programs.

GST: All prices listed above include 10% GST.

PROGRAM REQUIREMENTS:

- access to the presentation room 1 hour prior to the first session
- a room that can be darkened
- 2 tables at the front of the room
- a power point
- a sink with running water in the room
- seating for up to 60 students

Bookings: CSIRO Education, phone (03) 9252 6387, fax (03) 9252 6256.
